

SEE YOUR IMPACT

When you choose Abiliti™, you're not only caring for your child. Each annual purchase of an Abiliti™ product will provide a comprehensive eye exam to a child in need through Sight For Kids®. We believe that every child deserves access to eye care, so we've partnered with the Lions Clubs Foundation through Sight For Kids to make it happen.

*also available for adult myopes

† Previously marketed under Menicon Z Night.

‡ Initial approval for Orthokeratology was granted in 2006.

§ The lenses are indicated for reducing refractive error up to 6.00D of myopia and up to 1.50D of astigmatism. Results may vary by patient and prescription level.

^ Compared to single-vision spectacles.

Important Information for Contact Lens Wearers:

ACUVUE® Abiliti™ Overnight Therapeutic Lenses are available by prescription only for the management of myopia. An eye care professional will determine whether these contact lenses are right for you. Although rare, serious eye problems including vision loss and blindness can develop while wearing contact lenses. To help avoid these symptoms, follow the wear and replacement schedule and the lens care disinfection instructions provided by your eye care professional. Do not wear these contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact to your eye doctor immediately. For more information on proper wear, care and safety, talk to your eye care professional and review the Patient Instruction Guide, call 1-877-334-3937, or visit www.seeyourabiliti.com.

Johnson & Johnson VISION

KEEP YOUR KID* UNSTOPPABLE

Take charge of myopia with
ACUVUE® Abiliti™ Overnight Lenses.

ACUVUE®
abiliti™

WHAT IS MYOPIA?

Myopia is typically known as nearsightedness, but we know now it's so much more. It is a **chronic, progressive disease**,¹⁻³ in which the eye grows too long. Myopia typically gets worse over time, and can lead to sight-threatening complications.¹

TAKE CHARGE

You CAN take charge of your child's myopia with ACUVUE® Abiliti™!

Johnson & Johnson Vision is committed to changing the trajectory of myopia through the creation of the ACUVUE® Abiliti™ brand. We're excited to announce the first of our developing suite of therapies, ACUVUE® Abiliti™ Overnight Therapeutic Lenses for Myopia Management.

Say Hello to Abiliti™ Overnight Lenses

Abiliti™ Overnight lenses are FDA-approved orthokeratology lenses for myopia management.⁵ These lenses are worn overnight to provide vision correction during the day.

WHY CHOOSE ABILITI™ OVERNIGHT?

FDA-Approved

Abiliti™ Overnight lenses are FDA-approved lenses that provide sufficient oxygenation to the eye for safe and comfortable wear.^{4,6} They have been worn by thousands of patients for over 15 years.¹⁵

Freedom All Day

Abiliti™ Overnight lenses correct your child's myopia overnight, allowing them to be glasses and contact lens free during the day.^{5,6}

Because they are worn at night, these lenses won't interfere with your child's day-to-day life. No broken glasses or prescription athletic goggles—just improved vision so kids can be kids.⁶

Children who wore Abiliti™ Overnight lenses reported better performance in school and in activities compared to children wearing glasses.⁶

Peace of Mind

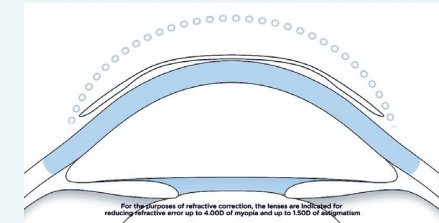

A prescription for Abiliti™ Overnight lenses is more than just vision correction. It's a system that manages your child's myopia, provides vision correction, AND allows them to be glasses and contact lens free during the day.⁶

Abiliti™ Overnight lenses can improve your child's experience with myopia and the world around them. Additionally, lifestyle changes like breaks from near work and increased outdoor play can have a huge impact on myopia.^{7,8}

UNDERSTANDING THE SCIENCE

Abiliti™ Overnight lenses are specifically designed for your child's unique eye shape. When put in before bed, the lenses gently reshape your child's soft eye tissue while they sleep.⁶

Before Abiliti™ Overnight

-3.0D Vision

After Abiliti™ Overnight

Clear Vision

Simulated representative view

The lenses rest gently on the eye to slightly flatten the cornea which temporarily corrects vision and allows children to be glasses-free throughout the day.^{5,6}

In addition to managing myopia, Abiliti™ Overnight lenses are also approved for treating astigmatism.⁵
